AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the above-identified application:

1. (Previously Presented) A bearing, comprising:

a first bearing ring including a race;

a second bearing ring including a race that is aligned with the first bearing ring race;

rotating members located between the first and second bearing ring races and bearing thereon;

an alignment cage located between the first and second bearing rings and having openings therein that locate the rotating members in spaced-apart alignment between the first and second bearing races, the alignment cage having first and second faces between which the openings extend and at least a third face coupling the first and second faces; and

one or more vibration suppressors coupled to the alignment cage, at least one of the vibration suppressors comprising one or more arc segments coupled to the third face by one or more springs.

2. (Previously Presented) The bearing of claim 1 wherein the first face is outboard of the rolling members and one or more vibration suppressors are mounted at least in part on the first face.

3. (Cancelled).

4. (Previously Presented) The bearing of claim 1 wherein the alignment cage is substantially circular.

5. (Cancelled).

6. (Previously Presented) The bearing of claim 1 further comprising one or more vibration damping pads between the third face and the one or more arc segments.

7. (Cancelled).

8. (Cancelled).

9. (Cancelled).

10. (Cancelled).

11. (Cancelled).

12. (Cancelled).

13. (Cancelled).

14. (Cancelled).

15. (Cancelled).

16. (Cancelled).

17. (Currently Amended) The bearing of claim [[14]] 1 wherein the arc segment [[mass]] comprises a substantially discrete mass.

18. (Currently Amended) The bearing of claim [[14]] 1 wherein the arc segment [[mass]] comprises a distributed mass.
